Confidential computer software. Valid license from Micro Focus required for possession, use or copying. The information contained herein is subject to change without notice.

The only warranties for Micro Focus products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Micro Focus shall not be liable for technical or editorial errors or omissions contained herein.

No portion of this product's documentation may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying, recording, or information storage and retrieval systems, for any purpose other than the purchaser's internal use, without the express written permission of Micro Focus.

Notwithstanding anything to the contrary in your license agreement for Micro Focus ArcSight software, you may reverse engineer and modify certain open source components of the software in accordance with the license terms for those particular components. See below for the applicable terms.

U.S. Governmental Rights. For purposes of your license to Micro Focus ArcSight software, "commercial computer software" is defined at FAR 2.101. If acquired by or on behalf of a civilian agency, the U.S. Government acquires this commercial computer software and/or commercial computer software documentation and other technical data subject to the terms of the Agreement as specified in 48 C.F.R. 12.212 (Computer Software) and 12.211 (Technical Data) of the Federal Acquisition Regulation ("FAR") and its successors. If acquired by or on behalf of any agency within the Department of Defense ("DOD"), the U.S. Government acquires this commercial computer software and/or commercial computer software documentation subject to the terms of the Agreement as specified in 48 C.F.R. 227.7202-3 of the DOD FAR Supplement ("DFARS") and its successors. This U.S. Government Rights Section 18.11 is in lieu of, and supersedes, any other FAR, DFARS, or other clause or provision that addresses government rights in computer software or technical data.

ArcSight Enterprise Security Manager (ESM) Support Matrix

This document describes current platform support for ArcSight Enterprise Security Manager (ESM) and its components. The components include:

- ArcSight Manager
- ArcSight Console
- Correlation Optimized Retrieval and Retention Engine (CORRE)
- ArcSight Command Center
- Active Passive High Availability module

Note: The term **supported** indicates that the product has been sanity-tested on the indicated platform. Micro Focus will accept support calls and address issues with the product and the platform on which it runs.

End of Product Support Notices

For updated end-of-life schedules for all ArcSight products, including ESM, see the [ArcSight product life cycle information](#) page.

ESM 7.3 Supported Platforms and Products

The following upgrade paths are supported for software ESM (in both compact mode and distributed correlation mode) and ESM on an appliance:

Note: These upgrade paths do not apply for ESM with the High Availability module. Supported upgrade paths for ESM with the High Availability module are listed below these upgrade paths.

- For ESM 7.2 and 7.2 Service Pack 1, you can upgrade directly to ESM 7.3.
- For ESM 7.0 Patch 1 and Patch 2, first upgrade to ESM 7.2, then upgrade to 7.3.
- For ESM 7.0, first apply ESM 7.0 Patch 2, then upgrade to ESM 7.2. After you have upgraded to ESM 7.2, you can upgrade to ESM 7.3.
- For ESM 6.11, with or without patches, first upgrade to ESM 7.0 Patch 1, then upgrade to ESM 7.2. After you have upgraded to ESM 7.2, you can upgrade to ESM 7.3.

The following upgrade paths are supported for ESM with the Active Passive High Availability (APHA) module:

- If you are running version 7.2 or 7.2 Service Pack 1 of ESM and the APHA module, you can upgrade directly to version 7.3.
- If you are running version 7.0 of ESM, you must upgrade ESM to version 7.0 Patch 2 before you can upgrade to version 7.2. After you upgrade to version 7.2, you can upgrade to version 7.3. If you are running version 7.0 of the APHA module, upgrade the module to version 7.2. After you upgrade the module to version 7.2, you can upgrade to version 7.3.
- If you are running version 7.0 Patch 1 or Patch 2 of ESM, upgrade ESM to version 7.2. After you upgrade to version 7.2, you can upgrade to version 7.3. If you are running version 7.0 of the APHA module, upgrade the module to version 7.2. After you upgrade the module to version 7.2, you can upgrade to version 7.3.

GA date	July 2020
Operating systems and browsers:	
Supported operating systems for software ESM (compact mode, distributed mode, and Active Passive High Availability module) Note: In distributed mode, all cluster nodes must be on the same operating system version.	<ul style="list-style-type: none"> • Red Hat Enterprise Linux (RHEL) or Community Enterprise Operating System (CentOS) 8.1, 7.8, or 7.7, with or without FIPS enabled • RHEL 6.10 <p>Note: The Active Passive High Availability Module does not support RHEL 6.10.</p> <ul style="list-style-type: none"> • SUSE Linux Enterprise Server (SLES) 15 Service Pack 1 or 12 Service Pack 5, with or without FIPS enabled
Supported operating systems for the ArcSight Console	<ul style="list-style-type: none"> • RHEL or CentOS 8.1, 7.8, or 7.7 • SUSE Linux Enterprise Desktop 15 Service Pack 1 • macOS Catalina • Windows Server 2019 and 2016 • Windows 10 Enterprise (including patches)
Supported browsers for ArcSight Command Center	The latest version of Chrome, Firefox Extended Support Release, or Microsoft Edge (chromium-based only)
Related components:	
Forwarding Connector	8.0.0.8323.0 You can install the Forwarding Connector on any operating system and version that the ESM 7.3 ArcSight Manager supports.
