# ArcSight Forwarding Connector Release Notes

---

These release notes provide information for the current release of the ArcSight Forwarding Connector.

## ArcSight ESM Forwarding Connector

The ArcSight ESM Forwarding Connector can receive events from a source ESM Manager and then send them to a secondary destination ESM Manager, a non-ESM location (such as HP Operations Manager), or to an ArcSight Logger.

## Supported Versions of HP OM and HP OMi

The supported versions of HP OM include

- HP OM for Windows v9.0 and 8.16 (patch level 90)
- HP OM for UNIX v9.10
- HP OM for Linux v9.10
- HP OMi v9.01

OMi users are strongly encouraged to apply the latest patch, OMI\_00005 (build 09.01.210), to obtain critical fixes before running this integration.

- 
- HP OMi v9.10

## What's New in the ArcSight Forwarding Connector

To provide the most current versions of the SNMP Interceptor policies, the SNMP Interceptor policies for HP OM and HP OMi are decoupled from the Forwarding Connector. Information about uploading SNMP Interceptor policies for HP OM and HP OMi is now in the *ArcSight HP OM and HP OMi SNMP Interceptor Policy Readme*.

## To Apply This Release

ArcSight recommends using the Forwarding Connector executable included with the corresponding ESM or HP integration release. Download and install the appropriate executable for your platform. Note that these version numbers are specific to Forwarding Connector releases, not release numbers of other ArcSight products.

The installation executables are:

- ArcSight-5.1.7.6085.0-SuperConnector-Linux.bin
- ArcSight-5.1.7.6085.0-SuperConnector-Win.exe
- ArcSight-5.1.7.6085.0-SuperConnector-AIX.bin
- ArcSight-5.1.7.6085.0-SuperConnector-Solaris.bin

## Known Issues

Number	Description
CON-9550	<p><b>Issue:</b> During console mode connector installation the message “Custom code execution” can display multiple times.</p> <p><b>Workaround:</b> Ignore the “Custom code execution” messages. They do not affect the installation.</p>

## Fixed Issues

Number	Description
CON-10765	<p><b>Note: This fixed issue applies only to customers using ArcSight products in the Russia/Belarus timezones.</b></p> <p>A patched JRE is provided with this release to prevent the display of a time difference between the time reported, and the system time. This patch only affects customers using ArcSight products in the Russia and Belarus timezones. Russia and Belarus are no longer observing daylight saving time (DST) as of the end of October 2011.</p> <p>This patch does not affect customers in the Ukraine, since they will continue to observe daylight saving time.</p> <p>If you are in an affected timezone, contact ArcSight support for more details.</p>
